

A chapter of the American Institute of Architects

Dear Fellow Colleagues,

The AIA Connecticut Committee on the Environment (COTE) is planning a program on renovation and retrofit projects with a sustainability focus. We are exploring the possibility of including **Case Studies of local projects** as part the program, **concentrating on advanced content** for architects engaged in adaptive reuse, preservation, climate responsive design, and sustainable practice.

This is **“A Call for Sustainable Renovation Projects”**. We invite you to share your work so that it may be considered for inclusion in the program as a ‘case study’ that you would present and discuss with the audience. They can be privately funded, State, or Federal projects, including residential, institutional, commercial, and academic work.

Please email your reply to Joanne Rees at [jrees@aiact.org](mailto:jrees@aiact.org) with no hesitation to modify or add to the information requested.

**BUILDING AT A GLANCE:**

Building Name:  
Address/Location:  
Building Use or Building Type:  
Size:  
Started:  
Completed:  
Project Financing:

**BUILDING TEAM:**

Owner  
Architect  
Others  
Contractor/s

**BUILDING & SITE DESIGN PARTICULARS....paragraphs**

Describe Sustainable Design Strategies in Design, Land Use & Location, Lighting, Energy Conservation, Materials Uses/Selections, Building Systems, Water Conservation.

**BUILDING & SITE DESIGN PARTICULARS...visual information**

Provide simple/instructive copies of Floor Plans and Site Design  
Provide simple/instructive Building Cross Section  
Provide Photos

**ENERGY USE ANALYSIS AND USE DATA:**

(Use a Table or Graph Format)

**TIPS, LESSONS LEARNED, NEW RESOURCES DISCOVERED...:**

The more you can share of the design process, materials, systems, and construction process, the building’s poetic realities, and its energy data, the better...

Thank you in advance for your participation,  
Jay Bright, Lea Cromwell, and Kathleen Flynn
