

Third Edition of "*Green Building Materials: A Guide to Product Selection and Specifications*" published by John Wiley & Sons

The first two editions of this seminal reference book have sold over 6,200 copies worldwide. The latest edition is the result of thirteen months' work on the part of Ross G. Spiegel, FAIA and Dru Meadows and includes both expanded and new content. The new content includes: a chapter on eco-labels, green standards, and product certification, a new appendix providing reference information for sustainability standards and standards development organizations, and new sample specifications. In addition, the revised content includes: a review of trends affecting the future of green building materials and an updated approach and reference information for the product selection process. Whether you are new to the field of sustainable design and

construction or have been doing "green" for a while you will find this new edition invaluable.
